802.05 Minimum Lot Area

The minimum parcel size shall be ten (10) acres, with two exceptions: Cluster Design or Planned Development (PD).

In order to permit creative and environmentally sensitive site design, smaller parcel sizes may be permitted through the use of a Cluster Design as detailed below.

802.05.01 Cluster Design

The purpose of this section is to encourage alternative design techniques that efficiently make use of land and water resources; protect environmentally sensitive areas, natural features and soils of agricultural importance; and promote cost savings in infrastructure development and maintenance. Clustering development allows for the creation of lots smaller than the minimum lot sizes established in these Regulations, with the balance of the property maintained in open space.

802.05.01.1 Lot Design

- a. The minimum size of parcels to be developed is the effective minimum size allowable under the Administrative Rules of Montana adopted by the Montana Department of Environmental Quality under Title 76, Chapter 4, MCA.

- b. Apart from any parcel that will remain as undeveloped open space, the maximum size of each parcel to be developed in a cluster development is two (2) acres.
- c. The minimum amount of land preserved in a cluster development is equal to the base density of ten (10) acres per parcel, minus the area in new lots planned for development. For example, an 80-acre parcel can be divided into eight (8) lots (80s acres ÷ a base density of 10 acres per lot).

In the eighty (80) acre example above, each of the eight (8) cluster lots is one (1) acre in size as allowed under DEQ rules for water and wastewater. The 9th parcel, seventy-two (72) acres in size, is to be preserved as open space and/or a resource use(s). Under this development scenario, approximately ninety (90) percent of the parcel is maintained in open space, and the need for road construction is minimized.

Numerous other combinations and configurations are possible so long as they comply with the provisions for cluster development and the density restrictions.

802.05.01.2 Open Space Standards

The land preserved in open space and/or a resource use(s) must:

- a. Be maintained on a long-term basis through a revocable covenant prohibiting further subdivision, division, or development of the open space and/or resource use parcel. Revocation of said covenant requires approval by the BoCC. Revocations may be considered if zoning and/or development constraint conditions no longer require density to be limited on the subject property;
- b. Be accessible via a road and/or trail easement filed with the Lewis and Clark County Clerk and Recorder's office;
- c. Be identified on a final subdivision plat or certificate of survey (COS) (for exemptions from subdivision). The final subdivision plat or COS shall include a notation as to the official recordation location of the revocable covenant;

- d. Include a plan for ongoing use and maintenance as open space and/or a resource use(s) that includes provisions to manage vegetation and noxious weeds, and that may be amended by the BoCC in consultation with parties owning title to the land;
- e. When present, include environmentally sensitive areas such as wetlands, streams, floodplains or riparian areas; agricultural soils (prime farmland); wildlife habitat; rare, threatened or sensitive plants; and scenic resources such as hillsides or forested areas; and,
- f. Be located adjacent to the one (1) or more lots to be developed.

For projects that address the development constraints of road conditions and rural fire protection, smaller parcel sizes and/or greater densities may be permitted through a PD as detailed in Section 21.

802.06 Maximum Gross Density

The gross density shall not exceed one (1) parcel per ten (10) acres, unless the parcel is located in an approved PD that allows for greater densities.

802.07 Minimum Setbacks

Comments received from ZAP: Setbacks should be a minimum of twenty-five (25) feet to allow for front garage parking and to look somewhat natural (not crowding the road). Ten (10) foot setbacks may be ok for small lots with alley load garages.

802.07.01 Principal Use for parcels ten (10) acres or greater in size: (also applies to Special Exception Uses)
 Front: Twenty-five (25) feet.
 Side: Twenty-five (25) feet.
 Rear: Twenty-five (25) feet.

Principal Use for parcels under ten (10) acres in size: (also applies to Special Exception Uses)
 Front: Ten (10) feet.
 Side: Ten (10) feet.
 Rear: Ten (10) feet.

802.07.02 Accessory Use for parcels ten (10) acres or greater in size:

802.08 Encroachments (Setbacks)

802.08.01 Utility distribution lines and related equipment may be located within a required setback.

802.08.02 Fences and walls in excess of forty-two (42) inches in height are not allowed in the front setback.

802.09 Building Height

Maximum building height: thirty-five (35) feet

The maximum building height shall not apply to belfries, cupolas, penthouses or domes not used for human occupancy, roof-mounted church spires, chimneys, skylights, ventilators, water tanks, silos, parapet walls, cornices, antennas, utility poles and necessary mechanical appurtenances usually carried above the roof level.

802.09.01 The height of an antenna shall be no greater than the distance to the nearest lot line.

802.10 Parking Standards

The minimum number of off-street parking spaces required for each land use can be found in Section 806.

802.11 Lighting Standards

All outdoor electrical lighting shall be installed in conformance with the lighting standards found in Section 807.

803 Suburban Residential - 1 (Low-density Development – One (1) acre)

The 11th parcel, five (5) acres in size, is to be preserved as open space and/or a resource use(s). Under this development scenario, approximately fifty (50) percent of the parcel is maintained in open space, and the need for road construction is minimized.
