**ZAP Meeting, May 26<sup>th</sup>, 2021**

**Public comment, Andrew Thomas**

**Question:** Per the comment about flood plains in the zoned urban and transitional areas. How much did these areas contemplate flooding and other issues in their original design? If so, how?

**Comment:** The various discussions of limiting public comment and changing the meeting format appear to be spontaneous, arbitrary, and show a degree of contempt for public input. In any of these discussions, meaningful public participation, accessibility, and transparency should be considered.
