

# Lewis and Clark County Weed District

## Did you know...?

Montana law requires landowners to control noxious weeds on their property (MCA 7-22-21).

There is not a one-size fits all approach to weed control. What works for one type, may not work for another.

Last year's flooding likely spread many weed seeds. This year, there are several weeds of particular concern because of this.

### 2019 WEEDS OF CONCERN IN FLOODED AREAS

White top

Hoary Alyssum

Leafy Spurge

Canadian Thistle

Houndstongue

Spotted Knapweed

The Lewis and Clark County Weed District has many resources to help you with weed management!

- \* Help with property inspections and in developing weed management plans for your property.
- \* We have spray rentals.
- \* We have a list of licensed commercial applicators we can provide.
- \* We have lots of information on weeds and how to manage your property. If we don't have it, we can find someone who does!
- \* Additional resources for weed related questions or plant identification include:

MSU Extension Office
